Building a Safer Space Online: Challenges and Solutions

The rise of social media and user-generated content has provided unprecedented access to information. However, it but has also led to the spread of misinformation and various forms of online harms, especially for young users. As more children spend time online, concerns around exposure to inappropriate content and inadequate protection of data and privacy continue to grow. This panel discussion brings together experts to share their insights on issues such as the challenges in regulating online content, the effectiveness of existing regulation models, the roles of various players in creating a safer online environment, and leveraging technology to improve content regulation. The panel will also look at how we can create a safer and age-appropriate online environment for young users, while also protecting their privacy. Finally, the discussion will cover the potential for public education to complement online safety regulations.

Legal Implications of Generative AI – is it a tool of the future?

Generative AI has emerged as a powerful autonomous tool with numerous applications in various fields, including art, music, and design. However, its legal implications present several challenges. This panel will explore the extent to which copyright protection may potentially subsist in AI-generated works, as well as how copyright ownership issues of such works can be resolved under prevailing legislative regimes. The panel will also critically examine whether the computational data analysis exception covers the use of generative AI and whether these and other uses may also potentially qualify as fair use. The use of material that could include personal data which is accessible from the Internet has led to investigations for possible violation of data protection laws. Furthermore, the panel will discuss the legal analysis that emanates from the source material that may be used to train AI systems and the methods for gathering such material. Given that some of this source material may be potentially protected by copyright and data protection laws, there are concerns regarding the legality of such gathering methods. The panel will also discuss what kinds of data, works of art, copyrighted materials, and other materials are suitable for use in generative AI, and the extent to which rights may be cleared.

Developing and Deploying Immersive Technologies and the Metaverse: Current Policy & Legal Issues for Practitioners and Anticipating Future Challenges and Solutions

Given that people's experiences in immersive technologies (virtual reality, augmented reality, and mixed reality; or collectively, "XR") and eventually, the metaverse, more closely mimics / will closely mimic physical life, what legal and policy issues are practitioners currently facing, and what solutions are they using to address these issues? And then, looking 2, 5, and even 10 years ahead - how should we think about behavior in the context of these technologies, and new risks that will emerge? What rules are needed for effective mitigation of these risks and how can we best enforce them? At what level are these best decided - platform-wide, at the hardware level, at the app store level, at the distinct experience / game / environment level, or at the level of individual communities? What are the responsibilities of app developers, hardware developers, community moderators, and other parties involved in building and deploying these technologies and experiences? We will look at the top current policy and legal issues prevalent in the development and deployment of XR technologies, current solutions - and, anticipating the increase in related challenges and opportunities - how these solutions could evolve, to address the possible need for a reimagined governance framework for XR technologies and the metaverse.

Navigating the Complexities of Generative AI: Deepfakes, Malicious Code, and Cybersecurity Challenges

Generative AI has brought remarkable advancements to various fields, but it also comes with a host of concerns and risks. This panel discussion dives into the multifaceted issues associated with generative AI, focusing on three critical areas: deepfakes, the potential generation of malicious code and applications, and the use of generative AI as an active tool in uncovering vulnerabilities and identifying attack vectors, particularly in the realm of cybersecurity. Expert panelists will explore the implications of deepfakes on privacy, misinformation, and trust, examine the risks posed by the generation of malicious code and its impact on cybersecurity defenses, and shed light on the innovative applications of generative AI in vulnerability discovery. Join us as we delve into the complexities of generative AI and discuss strategies to mitigate its risks while maximizing its potential for positive impact.

Day 2

22 September 2023

0900 – 0930 GMT +8

Global Developments in the Regulation of Online Intermediaries

In this panel, the evolving regulatory landscape for online intermediaries will be examined, including the changing roles and expectations of internet intermediaries and calls for greater regulation. Since the 2000s, online intermediaries have generally been granted exclusion of liability and safe harbour provisions, with no obligation to monitor the content they host. However, some internet intermediaries now compete directly with merchants on their platform, monetize services through advertisement and paid ranking priority, and have access to and use data generated by merchants on the platform. The changes that have taken place include subjecting online intermediaries to requirements to block and carry corrections, and imposing obligations of transparency on intermediaries. Ongoing changes include the EU Digital Services Act and Digital Markets Act, which aim to impose higher levels of obligations on online intermediaries that meet the threshold for gatekeepers, such as restrictions on the use of data and mandatory provision of access to data.

Impact of Global Developments in the Regulation of Online Intermediaries on Asia

Panel discussion on the impact of global developments in the regulation of online intermediaries on Asia, including the specific impact on Asian startups targeting EU and Japanese markets, as well as Asian unicorns with a global footprint. The panel will explore the potential trend towards greater regulatory alignment in Asia and comment on how quickly Asian governments might adopt these developments. Other topics include cyber security, common standards, and the implementation of safeguards. The discussion will focus on online marketplaces rather than network service providers.

Technology Touchpoints in ESG

The urgency and dynamism with which ESG needs are evolving, pose real and immediate challenges to governments, businesses and investors alike, whether in developing, implementing, tracking, assessing, managing or improving ESG action plans and strategies. The gaps between ESG intention and ESG manifestation call for more effective, transparent and empirically-based solutions to these challenges, as in these gaps lie the opportunity for circumvention or misrepresentation, such as in the form of greenwashing or “green-hushing”. Is technology the hero or anti-hero in this quest?

This panel explores the touchpoints between technology and the ESG space, where technology offers aid for compliance with ESG disclosure and reporting mandates and frameworks, ESG benchmarking in relation to risk factors and risk management and alignment with reporting frameworks, access to meaningful ESG data to drive appropriate decision-making, keeping up with changing ESG requirements, standards and frameworks, and scaling ESG competence, all in a prevailing sustainability-talent crunch. It will address related issues such as whether technology is the panacea for typically small and under-resourced ESG teams in meeting time-sensitive ESG goals, whether ESG responsibilities may be delegated to technology, whether technology itself in the ESG space introduces challenges of its own and whether allocation of liability arising from technology reliance in ESG compliance needs to be differentiated. ESG is both the cause and effect of seismic changes in business value systems, in the way stakeholders require how the bottom-line is met and in the expectations of investors, which are in turn irrevocably re-defining the command chain that drives businesses. In this environment, actors and advisers are compelled to keep abreast of demands in the ESG space and how technology is stepping up to these demands, to arm themselves with the ability to distinguish between noise and news, and to potentially re-shape their own role as properly-aligned and useful service providers.

From Winter to Spring: Insights from the Crypto Crash and lessons on moving to a Crypto Spring

Join our panel of experts as we examine what lessons if any can be learnt from the aftermath of the crypto crash, and what steps can be taken to turn from a crypto winter to a crypto spring. We'll take a closer look at possible causes of the crypto winter and discuss the learning points to be gleaned. We will then consider whether the answer to the issue is further regulation, and what roles regulators can play. Don't miss this insightful discussion on the future of crypto.

22 September 2023

1630 – 1800 GMT +8

Navigating Tomorrow: Insights on the Future of Digital Governance, AI Regulations, and Legal Practice

As the curtains draw to a close on an intellectually stimulating two-day conference, our closing session, “Navigating Tomorrow,” will feature three thought-provoking interventions that synthesize and project the future of critical domains in our ever-evolving digital landscape.

Unveiling the Digital Regulatory Frontier - Our first speaker will take the stage to illuminate “The Future of Digital Regulations.” Drawing from the robust discussions of the past two days, this intervention promises to chart a path through the intricacies of online safety and the regulation of online intermediaries. While contemplating the trajectory established by recent developments, the speaker will also venture into the uncharted territory of regulating the metaverse and cryptocurrencies, providing educated predictions on how this expansive space might evolve.

Forging the Path of AI Regulations - The second speaker will dive deep into “The Future of AI Regulations.” With AI poised to transform industries and societies, they will elucidate the three emerging models of AI regulation: the holistic regulatory framework exemplified by the EU AI Act, sector-specific regulations such as those governing recommendation systems and generative AI, and the novel extension of personal data protection into AI systems. Their insights will navigate the intricate path ahead, illuminating the strategies that will guide AI into a responsible and regulated future.

Legal Practice and Education in the Digital Age - Our final speaker will explore “The Future of Legal Practice and Education,” by delving into the intersection of technology and law. This intervention will peer into the horizon of legaltech’s impact on access to justice, the transformation of legal services, and the profound implications for the training of future lawyers. Attendees will gain a glimpse into the ever-changing landscape of legal practice in our increasingly digital world.

Join us for this enlightening closing session, where these three dynamic interventions will weave together the threads of our discussions, providing invaluable insights into the future of digital governance, AI regulations, and the legal profession. This final segment is your compass for the digital age, helping you chart a course toward a more informed and forward-thinking future.

Commentator:
Ms Denise Wong

Assistant Chief Executive, Data Innovation & Protection Group and Deputy Commissioner, Personal Data Protection Commission, Singapore Infocomm Media Development Authority

The Honourable Justice Aedit Abdullah

Judge of the High Court Supreme Court of Singapore

Prof Simon Chesterman

Dean National University of Singapore

Prof Ian Walden

Day 1

21 September 2023, Thursday

1000-1015

AI Governance for financial institutions

Ms Ying Yi Liew, Local Principal, Baker McKenzie Wong & Leow

1015-1030

Prarambh, CAM's LegalTech Incubator

Ms Komal Gupta, Chief Innovation Officer, Cyril Amarchand Mangaldas

1030-1045

Digital Path to Greater Access to Justice

Ms Claire Kok, Assistant Director (Assistant Head, Legal Affairs), Cyber Youth Singapore

1045-1100

Automated Case Downloading and Bundling, Appointment Booking and Document Generation

Mr Wilson Foo Yu Kang, Managing Director, Custom Automated Systems® Pte Ltd

1100-1130

Shaping LegalTech for Businesses Today

Mr Michael Lees, Chief Operating Officer, Rajah & Tann Technologies

Mr Justin Lee, Partner, Rajah & Tann Singapore

Mr Mark Tyndall, APAC Head of Consulting and Sales, Neota

Mr Melvin Chee, Client Engagement Lead, Rajah & Tann Technologies

1130-1200

Building Better (and Safer) Online Experiences for Kids & Teens

Mr Kieran Donovan, Co-Founder & Chief Executive Officer, k-ID

Mr Jeff Wu, Former Head of Trust & Safety APAC, Ex-Meta

Mr Yeong Zee Kin, Chief Executive Officer, Singapore Academy of Law

1200-1215

A Look Behind the Curtain: How LexisNexis is Transforming Legal Practice-Responsibly

Ms Joanne Wade, Senior Director, Product Management, Asia Pacific, LexisNexis Legal & Professional

1215-1230

Generative AI may not be the answer

Mr Andrew Beasley, Regional Director for Innovation & Best Delivery, Clifford Chance

1230-1300

From Briefcases to Algorithms: Reimagining the Business of Law in Asia

Mr Julian Barendse, ASEAN Counsel, Mori Hamada & Matsumoto (Singapore)

Mr Reiji Hosokawa, Counsel, Mori Hamada & Matsumoto (Singapore)

Mr Panupan Udomsuvannakul, Partner, Chandler MHM (Bangkok)

1300-1315

Anti-Money Laundering and Countering the Financing of Terrorism Compliance Solution for Businesses

Mr Melvin Chee, Client Engagement Lead, Rajah & Tann Technologies

1400-1415

How to Pilot & Implement Legal Tech in Your Law Firm

Ms Sorcha Boyce, Senior Legal Tech Engagement Manager, APAC - Allen & Overy

Mr Harry Kishen, Legal Tech Analyst, APAC - Allen & Overy

Ms Stephanie Siu, Director of Strategic Development / Legal Counsel, APAC, eBrevia, Inc.

1415-1430

Enabling Responsible AI in India - An Ecosystem Approach

Ms Jameela Sahiba, Senior Program Manager, The Dialogue

1430-1445

Apply the Power of Generative AI to Supercharge your Contract Review with LegalOn

Mr JP Biard, Head of Global Strategy, LegalOn Technologies

1445-1500

Growing the Legal Innovation & Technology Ecosystem Across the Asia-Pacific Region

Mr Brian Tang, Co-chairperson, Asia Pacific Legal Innovation & Technology Association; LITE Lab@HKU

Ms Adeline Chin, Co-chairperson, Asia Pacific Legal Innovation & Technology Association

1500-1530

Award presentation for (1) ALITA Outstanding Legaltech Entrant Award 2023 and (2) ALITA Outstanding Legal Innovator (Law Firm) Award 2023

1530-1545

The Impact of Technology on Law: Preparing for the Future

Mr David N. Alfred, Director, Drew & Napier LLC

1545-1600

Web 3.0 Legal Issues for the Non-blockchain Business

Mr Chua Tju Liang, Director, Drew & Napier LLC

1600-1630

Empowering Small to Mid-Sized Firms with the Legal Technology Platform

Mr Marcus Lim, Director (APAC), LUPL

Ms Luo Ling Ling, Founder and Managing Director, Luo Ling Ling LLC

Mr Lim Seng Siew, OTP Law Corporation

1630-1700

Generating the future: What generative AI tools mean for the next generation of lawyers

Mr Josh Lee Kok Thong, Managing Director, APAC, Future of Privacy Forum

Mr Steve Tan, Partner, Rajah & Tann Singapore / Rajah & Tann Technologies

Ms Anita Parkash, Director (Pedagogy & Planning), Singapore Judicial College

1700-1730

Award presentation for (1) ALITA Outstanding Legal Innovator (Solution Provider) Award 2023 and (2) ALITA Outstanding Legal Innovator (In-House & Operations) Award 2023

1730-1800

Presentation by winners of SMU Legal Innovation and Technology (LIT) Hackathon

Ms Kaelyn Lim Yuqi, Student, Temasek Polytechnic

Mr Krysh Chainani, Student, Temasek Polytechnic

Ms Daduya Nicole Michaela Cuneta, Student, Singapore Management University

Ms Elisa Khoo, Director, Tenobob

Mr Drustan Yeo, Director, Tenobob

Day 2

22 September 2023, Friday

1000-1015

Of Tulips and Public Blockchains: Fiduciary Duties of Core Developers?

Mr Michael Man Hon Ng, Lecturer, SUSS School of Law

1030-1045

Staying Competitive with LegalTech - Real Case Studies with Lupl

Mr Marcus Lim, Director (APAC), LUPL

1045-1100

Introducing k-ID: A Revolutionary Technology for Empowering Kids & Teens Online

Mr Kieran Donovan, Co-Founder & Chief Executive Officer, k-ID
Mr Jeff Wu, Former Head of Trust & Safety APAC, Ex-Meta

1100-1115

The New Age of Techno-Legal Evolvement

Ms Nga Lai Alice Chan, Vice-Chairman/Managing Director, RCEP International Centre

1130-1200

Fireside Chat powered by the SMU Centre for Computational Law

Assistant Professor Lim How Khang, Director, Centre for Computational Law, Singapore Management University
Mr Wong Meng Weng, Principal Research Fellow
Singapore Management University

1200-1215

Operationalising "Responsible AI" in Public Administration: A Complex Socio-Technical Problem

Associate Professor Jason Grant Allen, Director, Centre for AI & Data Governance; Urban Fellow, Singapore Management University

1215-1230

Square pegs and round holes: The law and tech?

Mr Rakesh Kirpalani, Director, Drew & Napier LLC

1230-1300

How Generative AI will impact in-house teams

Ms Lena Ng, Partner, Clifford Chance
Mr Chee Kin Lam, Managing Director & Head of Group Legal & Compliance, DBS Bank Ltd

1300-1315

How to Maximise the Power of AI and Leverage AI Responsibly

Ms Jennifer Cathcart, Regional Manager, NetDocuments

1315-1330

In a world driven by AI, how might the process of preparing for disputes transform, and how can we equip ourselves for this change?

Ms Serena Lim, Founder/Business Development Director, Wysk /Litigation Edge

1330-1400

Applying Large Language Models for Enhancing Contract Drafting

Mr Yeong Zee Kin, Chief Executive Officer, Singapore Academy of Law

Professor Lam Kwok Yan, Associate Vice President (Strategy & Partnerships) | Executive Director, National Centre for Research in Digital Trust | Professor, School of Computer Science & Engineering | Director, Strategic Centre for Research in Privacy Preserving Technologies and Systems (SCRIPTS) | Director, SPIRIT Smart Nation Research Centre, Nanyang Technological University

1415-1430

Unlocking Process Automation: Streamlining Legal and Business Operations with Neota and AI

Mr Mark Tyndall, APAC Head of Consulting and Sales, Neota

1430-1500

Award presentation for (1) ALITA Outstanding Legal Innovator (Individual) Award 2023 and (2) ALITA Outstanding Legal Innovation & Technology For Good Award 2023

1600-1630

Launch of Technology Regulation in the Digital Economy

Mr Yeong Zee Kin, Chief Executive Officer, Singapore Academy of Law

Mr Kenta Kusano, Chief Executive Officer, LawNet Technology Services

Organised by
