Artificial Intelligence accelerates legal insight

At Booth 11 see a demonstration of Luminance's revolutionary machine learning capabilities and meet our team

Luminance's panel session on the future of AI and the legal industry with **Wai King Ng**, Managing Partner at WongPartnership and **Rajesh Sreenivasan**, Partner at Rajah & Tann.

1.15-2.15pm 5th April

Luminance Demonstration

3pm, 4th April on the Tech Talk Stage

TIME (hrs)	SEGMENT	SPEAKERS/PANELLISTS	SYNOPSIS
09H00	DAY 1 OPENING REMARKS	Vivian BALAKRISHNAN Minister-in-Charge of the Smart Nation Initiative, Singapore	Smart Regulation Amid Technological Disruption
09H15	OPENING KEYNOTE	Ashton ADDISON - CEO & Founder EVENTCHAIN INTERNATIONAL SMART TICKETS (EVENTCHAIN.IO)	<p>Smart contracts and blockchains are an evolving technology considered to be in early adoption. While smart contracts have achieved great things in the world of business so far, the tech innovations that are still to come will have revolutionary effects on privacy, security, immutability and enforceability in tech law. Blockchain technology has many obstacles to overcome to achieve this mainstream adoption.</p> <p>The underlying technology of the Ethereum blockchain does not have the scalability to handle the world's current business needs. The process of creating smart contracts on the Ethereum platform requires technical knowledge and constant rethinking to keep up with the changing pace of international business. Ashton Addison will be sharing how this magnificent technology when it reaches its potential may not only reshape how lawyers approach tech, it may revolutionize how companies are incorporated, raise capital, distribute assets and conduct business domestically and internationally.</p>
10H00	TEA BREAK		
10H30	PANEL 1 Smart Regulation for a Smart Nation	<p>Chairperson: Warren B. CHIK - Associate Professor - SINGAPORE MANAGEMENT UNIVERSITY SCHOOL OF LAW</p> <p>Panellists: 1. Antony COOK - Associate General Counsel, Corporate External and Legal Affairs - MICROSOFT ASIA 2. Zee Kin YEONG - Assistant Chief Executive (Personal Data Protection Commission) - INFOCOMM MEDIA DEVELOPMENT AUTHORITY 3. Jo YEO - Deputy Director, Fintech & Innovation Group - MONETARY AUTHORITY OF SINGAPORE 4. Nathaniel MANGUNSONG - Group General Counsel - GO-JEK 5. Chong Kin LIM - Director, Head of Telecommunications, Media & Technology - DREW & NAPIER LLC</p>	<p>This panel will feature a range of perspectives on, and approaches to, the regulation of emerging technologies and technological innovation. What types of mindsets and actions do governments and policy-makers need to adopt in order to create spaces for experimentation while protecting against exploitation? What are the thoughts of the technology creators on regulations and what are their experiences on such regulations in different jurisdictions?</p> <p>These questions will be critically discussed by panellists from the public and private sector, with reference to case studies from a range of industries and jurisdictions. Traditional regulatory mechanisms, such as individual and class licences, will be examined for their relevance and limitations. The Singapore Fintech experience will guide discussion about the desirability and challenges of regulatory sandboxes. Forms of ex ante regulatory clearance and industry codes of conduct and best practices will also be explored as more agile and community-driven alternatives to hard regulation. The session will conclude with a distillation of key characteristics and considerations of a smart approach to regulation in a digital age.</p>
12H00	LUNCH		
13H30	PANEL 2 Regulating Intelligent Systems	<p>Chairperson: Jennifer KOO - Director Corporate, External and Legal Affairs - MICROSOFT SINGAPORE</p> <p>Panellists: 1. Suresh SACHI - Deputy Managing Director (Corporate & Legal), General Counsel - A*STAR 2. Shiang Long LEE - President - SINGAPORE TECHNOLOGIES KINETICS LTD 3. Michael TAN - Head of Legal, Southeast Asia and India Legal Partnerships - GOOGLE 4. Susan NING - Senior Partner, Head of the Commercial and Regulatory Group - KING MALLESONS WOODS BEIJING</p>	<p>What is artificial intelligence (AI) and to what extent does the deployment of the technology challenge existing legal and regulatory frameworks? This panel grapples with the tricky issue of whether new forms of laws and regulations are required for the regulation of technologies which have degrees of autonomous function such as driverless cars, technology-assisted document review, recidivism profiling systems, sentencing and case outcome prediction systems, chat-bot customer service, robot care-givers and other services and products which rely on autonomous decision-making made possible by cognitive computing. Is the regulation of AI desired or even possible, and should regulation be outcomes-focused and technology neutral, addressing the effects of the technology rather than the AI itself?</p> <p>Might it be possible to conceive an approach to AI regulation that is analogous to Asimov's Three Laws of Robotics and what would the contents of such universal principles look like? In all of this, what are the ethical considerations which would guide the actions of the human individuals creating and using such intelligent systems? This session will attempt to appreciate the challenges of responding to these questions from both the maker and the regulator perspectives.</p>
15H00	TEA BREAK		
15H30	PANEL 3 The Power and Pitfalls of Smart Contracts	<p>Chairperson: Joyce A. TAN - Managing Partner - JOYCE A. TAN & PARTNERS</p> <p>Panellists: 1. Ashton ADDISON - CEO & Founder - EVENTCHAIN INTERNATIONAL SMART TICKETS (EVENTCHAIN.IO) 2. Hirofumi AIHARA - General Manager, Digital Innovation - MITSUBISHI UFJ FINANCIAL GROUP 3. Sopnendu MOHANTY - Chief Fintech Officer - MONETARY AUTHORITY OF SINGAPORE 4. Stella CRAMER - Head of Technology & Innovation, Asia Pacific - NORTON ROSE FULBRIGHT</p>	<p>Way beyond Bitcoin and demonstrating a continued thirst for decentralisation, transparency and trust, is a larger wave overtaking the way businesses are interacting with their customers and other businesses, and managing their transactions, exemplified by the emergence of smart contracts in the forms of Decentralised Autonomous Organisations (DAOs), Initial Coin Offerings (ICOs) and Token Generating Events (TGEs).</p> <p>Why are smart contracts taking the world by storm? When does a contract become "smart" and what makes for a "smart contract"? How are regulators keeping up with and how should they regulate smart contracts, if at all? Is the law adequately developed to address the challenges posed by smart contracts and serve their growing needs? With blockchain hitting the mainstream, and unleashing a seemingly limitless potential for smart contracts and their wide-ranging application across myriad industries, a closer study of what all this means for businesses, regulators, judges and lawyers, is timely.</p> <p>The revolution cuts across technology to the handling of contractual rights and obligations, contractual disputes, cross-border contract negotiation and conclusion, and how contract value is defined in non-fiat financial terms. This panel takes a deconstructed look at what has happened in recent times in this space, and a conspectus of what lies ahead.</p>
17H00	DAY 1 CLOSING KEYNOTE	Silvino SCHLICKMANN - Cybercrime Director - INTERPOL	
18H00	END OF DAY		

TIME (hrs)	SEGMENT	SPEAKERS/PANELLISTS	SYNOPSIS
09H00	DAY 2 OPENING KEYNOTE Addressing the Societal Implications of an AI-powered World	Brad SMITH - President and Chief Legal Officer - MICROSOFT	Artificial Intelligence(AI) will certainly be one of the most transformative technologies of the 21st century. While it holds enormous potential in addressing some of our most pressing societal challenges, it will certainly impact many aspects of our day-to-day lives, including how we work and do business. This rise of machines that behave like humans is creating a great deal of uncertainty. What jobs will this new technology eliminate? What jobs will it create? How will we manage the ethical implications of AI? These are all questions we must contemplate as we head into an AI-powered future. Join Brad Smith, president of Microsoft as he explores these and other issues related to the rise of AI.
10H00	TEA BREAK		
10H30	PANEL 4: Evolution of the Digital Economy: Framework for Cross-border e-Commerce, Media Consumption and the Gig Economy	Chairperson: Gladys CHUN - General Counsel - LAZADA GROUP Panellists: 1. Tzi Yong SIM - Member of Practice Council - NEW YORK UNIVERSITY SCHOOL OF LAW 2. Gloria O. PASADILLA - Senior Analyst, Policy Support Unit - ASIA PACIFIC ECONOMIC CORPORATION (APEC) 3. Darrell CHAN - Deputy General Counsel - AIRBNB APAC 4. Meng Yew WONG - Partner, Global Trade Advisory - DELOITTE SINGAPORE 5. Katrina JOHNSON - Associate General Counsel & Head of Legal - UBER ASIA PACIFIC	In today's digital world, one can perform almost all day-to-day activities online from ordering goods and services, buying tickets, food delivery, to planning your vacation and watching movie on-demand. With the volume of online and social commerce increasing exponentially, these new models are stress testing the old mechanism of regulating trade in the digital economy. The notion of "business operations", unproblematic for a brick-and-mortar status quo, is ambiguous for a model which operates out of website locations or blended models where e-Commerce giants establish physical stores. Cross-border trade in particular, facilitation of goods across borders continues to be a challenge. Taxes which focus on domestic consumption are oblivious to the fluid consumption patterns of online buyers. Gig and crowd sourcing economy are commonly used a model of fulfilment. How have existing laws relating to non-traditional arrangements been exacerbated by gig economy practices and how do we define the relationships in the gig economy? What are the implications of this disconnect for all stakeholders and how can the deficiencies be addressed through more responsive regulatory mechanisms? This session will engage stakeholders in candid discussion about how businesses are trying to support their rapid growth whilst grappling with the grey areas in the absence of a clear regulatory stance.
12H00	LUNCH		
13H30	PANEL 5: Wising-up to the Mass Distribution of False Information	Chairperson: Stanley LAI SC - Partner/Head of Intellectual Property Practice - ALLEN & GLEDHILL LLP Panellists: 1. Warren B. CHIK - Associate Professor - SINGAPORE MANAGEMENT UNIVERSITY SCHOOL OF LAW 2. Alvin TAN - Head of Public Policy, Southeast Asia - FACEBOOK 3. Robin Callender SMITH - Professor, Centre for Commercial Law Studies - QUEEN MARY UNIVERSITY OF LONDON 4. Viswa SADASIVAN - Chief Executive Officer - STRATEGIC MOVES PTE LTD	Fake news or false information is a specific deleterious outcome arising from the application of intelligent systems to profile users and curate/create content for such users. Increasingly, social media and other platforms are grappling with calls for algorithmic transparency and stricter accountability for how personal data, news and other content are being altered to influence opinion or behaviour. This panel will examine the responsibilities and consequences for different stakeholders, especially online intermediaries. It will also debate the extent to which the problem can be effectively solved by laws and regulation. For example, the panel will discuss the merits and limitations of imposing online intermediary liability and immunity having regard to the divergent interests of conduits (carriers) as well as content providers/platform operators.
15H00	TEA BREAK		
15H30	PANEL 6: Legal Issues in Legal Tech	Chairperson: Zee Kin YEONG - Assistant Chief Executive (Personal Data Protection Commission) - INFOCOMM MEDIA DEVELOPMENT AUTHORITY Panellists: 1. Rajesh SREENIVASAN - Partner, Head of Technology, Media and Telecoms Practice - RAJAH & TANN SINGAPORE LLP 2. Adrian KWONG - Managing Director - CONSIGCLEAR LLC 3. Alexis CHUN - Co-founder - LEGALESE 4. Edmund KOH - Chief of Staff & General Counsel - INTELLLEX 5. Kwong Weng WAN - Head - Group Corporate Services & Group General Counsel - MAPLE TREE INVESTMENTS PTE LTD	The Legal Tech Vision maps the universe of Legal Tech into three broad categories. There is a baseline of office automation, communications and productivity software that all modern businesses use, including law firms and legal departments. There is a second category of Legal Tech solutions that are essentially software tools that are designed to assist lawyers in the delivery of their professional services. The third category of Legal Tech solutions starts to provide legal information services to clients. As lawyers rely more heavily on technologies to deliver professional services, for example the use of AI in the review of documents and conduct of due diligence, how will this affect their professional responsibilities to clients? What is the impact when technology shortens the runway for the training of young professionals? But the benefits of technology cannot be denied, particularly from the in-house perspective where solutions to manage templates and monitor compliance alleviate the pressures on a lean legal department. As clients have access to legal information services, how viable are these as a substitute for professional legal advice? This panel will discuss the legal and regulatory issues and broader impact of disruption to the legal services sector.
17H00	DAY 2 CLOSING KEYNOTE	Andrew ARRUDA - CEO and Co-founder - ROSS INTELLIGENCE	
18H00	END OF DAY		

TIME (hrs)	SEGMENT - SPEAKERS / PANELLISTS
09H00	<p>SEMINAR The Current State and Future of Legal Technology Adoption in ASEAN</p> <p>This session will be a bird's eye view of the impact legal technology is having on legal services within ASEAN. What are some of the existing practical challenges posing as barriers to legal tech adoption? How can they be addressed? Are prevailing attitudes a problem and is fear an adequate reason to change? Are we moving too fast or not fast enough? What are the implications for legal services within ASEAN?</p> <p>Engage with the responses to these questions from an ASEAN perspective.</p> <p>Gregory VIJAYENDRAN - President - LAW SOCIETY OF SINGAPORE Gaythri RAMAN - Managing Director, Southeast Asia - LEXISNEXIS Taur-Jiun WONG - President - SINGAPORE CORPORATE COUNSEL ASSOCIATION</p>
10H00	TEA BREAK
10H30	<p>SEMINAR Deliberate Disruption: A Tale of Three Law Firm Tech Journeys</p> <p>In this session, three law firms will share their thinking behind decisions to embrace technology. The impact of technology adoption on productivity, business models, people development and legal services offerings will be explored.</p> <p>The matter of innovation in law firms will also be discussed, in particular the nature of innovation in a legal services environment and what is needed to support it.</p> <p>Matt POLLINS - Head of TMT and Innovative Champion - CMS Mark GOH - Founder and Managing Director - VANILLALAW LLC Sophie MATHUR - Corporate Partner and Global co-Head of Innovation - LINKLATERS</p>
11H45	LUNCH
13H15	<p>SEMINAR Advising to Innovate – The Evolving Role of the Legal Community as Enablers of Digital Transformation</p> <p>In this session, Andrew will discuss various practice principles that can help position the legal community as facilitators of transformation and trusted partners to their various business stakeholders and clients.</p> <p>Andrew COOKE - Assistant General Counsel - MICROSOFT ASIA</p>
14H15	<p>LEGAL TECH PRIMER SESSION What Works for You? Legal Research, Document Review and Knowledge Management Tools</p> <p>This session will introduce current legal research, document review and knowledge management tools, explain the benefits of implementing these in law firm and legal department settings, and provide practical tips for how to make decisions about the adoption and use of such tools in a sustainable manner which improves an individual's work productivity and the organisation's bottomline.</p> <p>Serena LIM - Founder and Director - BIZIBODY TECHNOLOGY Jason LIM - Manager, Solution Sales - SERVTOUCH-WYWY</p>
15H15	TEA BREAK
15H45	<p>LEGAL TECH MASTERCLASS SESSION Legal Technology and Human-Centred Legal Design: Getting Started</p> <p>Technology will enhance and augment how we deliver legal services and how clients interact with such services. In this, it is necessary to appreciate technology as a means and not an end in itself.</p> <p>How can we offer technology-enhanced legal services in a way that continues to address the specific needs of clients?</p> <p>This session will introduce participants to the principles of human-centred legal design thinking as a means of problem-solving and solutioning using technology in a manner sensitive to client needs.</p> <p>Lixian HANTOVER - Associate Counsel - IDEO</p>
16H45	END OF DAY

TIME (hrs)	SEGMENT - SPEAKERS / PANELLISTS
09H00	<p>DIALOGUE Re-modelling the Business of Law: How Tech is Challenging the Traditional Law Firm and Lawyer</p> <p>Join us for a conversation on how technology is making it necessary for law firms to re-assess what their value proposition to clients is, how they adapt their own business models and legal services offerings, and the skills lawyers must equip themselves with to deliver such value.</p> <p>Come armed with your questions and prepared to engage actively in this session.</p> <p>Mark A. COHEN - CEO - LEGAL MOSAIC Duc TRANG - Managing Director - LONDON ADVISORY Javier DE CENDRA - Dean - IE LAW SCHOOL Adrian ANG - Partner - ALLEN & GLEDHILL LLP</p>
10H00	TEA BREAK
10H30	<p>SEMINAR In-house Legal Departments – The Challenge of Technology and Innovation</p> <p>Allen & Overy's strong reputation for legal tech and innovation is centred on its track record of delivering successful client solutions. A&O partner Jonathan Brayne has been a leading member of A&O's innovation programme for nearly 20 years, most recently as Chairman of Fuse, A&O's legal tech collaboration and innovation space in its London offices.</p> <p>In this interactive panel session, Jonathan shares his insights on legal technology and innovation for in-house legal departments, and discusses with A&O's clients in the ASEAN region their current priorities in the field.</p> <p>Jonathan BRAYNE - Chairman - FUSE - ALLEN & OVERY</p>
11H45	LUNCH
13H15	<p>SEMINAR New-Generation AI: Giving Control Back to Lawyers</p> <p>Luminance is the leading artificial intelligence platform for the legal profession. Developed by legal experts, the technology reads and understands contracts and other legal documents in any language, finding significant information and anomalies without any instruction.</p> <p>In this interactive panel discussion, Luminance Senior Legal Product Expert Kimberley Davies shares her perspective on how AI can give control back to lawyers over their work. Together with her top lawyer co-panellists, she discusses how narrow AI can be used to tackle specific problems in the legal industry and how it can support lawyers in various ways, ranging from due diligence and compliance work to insurance matters and contract management.</p> <p>Kimberley DAVIES - Senior Legal Product Expert - LUMINANCE</p>
14H15	<p>SEMINAR A Judge, A Lawyer and A Student Walk into the Bar Room ...</p> <p>Join a judge, a lawyer and a law student as they candidly discuss their reactions and responses to a variety of headlines on the impact of technology on matters of access to justice, legal services, legal education and the nature of the legal profession.</p> <p>What impact does a doom and gloom narrative have on motivation to change? Is the silver lining just for those with the deep pockets to invest in legal tech innovation? What is their take on these issues? What is yours? And what are we going to do about it?</p> <p>Justice Aedit ABDULLAH - Judge of the High Court - SUPREME COURT Amelia CHEW - Co-founder & Editor - LAWTECH.ASIA Seng Siew LIM - Director - OTP LAW CORPORATION</p>
15H15	TEA BREAK
15H45	<p>LEGAL TECH PRIMER SESSION What Works for You? Professional Networking, Client Management and Business Development Platforms</p> <p>How can you leverage on technologies to develop and maintain quality professional networks, manage client relationships and conduct effective business development?</p> <p>This session will take you on a practical journey through the considerations and challenges in implementing digital marketing in law firms, the range of platforms available and some best practices.</p> <p>Roy ANG - Regional Marketing & Business Development Manager - WITHERS WORLDWIDE Cherilyn TAN - CEO and Founder - ASIA LAW NETWORK</p>
16H45	<p>LEGAL TECH MASTERCLASS SESSION Programming and Analytics Demystified</p> <p>Much has been said about how Automation, Artificial intelligence and Analytics could impact the legal industry. Must lawyers now learn to code, and/or start doing math? Can and will certain legal jobs be entirely replaced? How can legal organisations make informed and defensible use of these cutting-edge technologies to deliver value and, ultimately, justice for their clients? The short answer? It depends.</p> <p>This session will discuss key concepts behind coding and analytics to provide a deeper, myth-debunked understanding of the two areas and explore how the legal community can embrace inter-disciplinary collaborations to make the most of emerging business and technological trends.</p> <p>Jerrold SOH - Co-Founder - LEX QUANTA</p>

**With AI, we have more power
at our fingertips than entire
generations that came before us.**

What will you do with it?

Our goal is to make AI available to everyone.
Learn more about our commitment to ensuring
our AI technologies are trusted.
