ROBES, RULES & ROBOTS: HOW WE BUILT LEGAL AI IN A REGULATED WORLD

Join us for an inside look at the journey of building various Legal AI Assistants within a lean team operating in a highly regulated industry.

This session will explore how Doctor Anywhere developed and deployed several AI solutions to support the Legal function, from initial concept through to implementation, creating AI tools that partner with business meaningfully. Participants will gain insights into the challenges, design considerations, regulatory constraints, and practical steps involved in creating an AI tool that adds real value—while staying compliant.

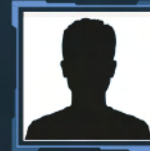

Whether you're exploring AI for Legal or working in a regulated environment, this is a chance to learn from our experience and ask questions along the way.

10:00AM - 12:30PM

COMPUTATIONAL LEGAL STUDIES WORKSHOP 2025

Held for the 4th year running by the Singapore Management University's Yong Pung How School of Law, the Computational Legal Studies Workshop 2025 (CLS2025) explores cutting-edge research on how emerging computational techniques including, but not limited to AI, machine learning, and network science can be harnessed to study as well as practice law. Past speakers have included leading academics sharing their latest works-in-progress and legaltech startups presenting their recent builds

The full workshop is a two-day event, running 8-9 September at the SMU Law School campus. Day One will be angled towards research and Day Two towards industry application.

For more details on the programme and speakers, please click [here](#).

SUZHOU INDUSTRIAL PARK INTERNATIONAL BUSINESS COOPERATION CENTRE TOUR

Visit the Suzhou Industrial Park International Business Cooperation Centre (SIP IBCC), located in Singapore's innovation hub one-north, to discover how IBCC is driving cross-border investment promotion between Singapore and China.

Since its establishment in October 2021, IBCC has supported over 160 companies from China and the Singapore region across diverse sectors such as green development, biomedical sciences, electronics, and more. Leveraging its strong network and resources, IBCC provides workspace solutions and partnership support—helping Chinese companies expand internationally and enabling regional firms to access the China market, with Singapore as a strategic gateway to Southeast Asia.

WOMEN IN LEGAL X TECH NETWORKING LUNCH

Join us for the Women in Legal x Tech Lunch, proudly hosted by Shumin Lin and Grace Chong of Drew & Napier, at TechLaw.Fest's Day 0!

This annual gathering brings together women lawyers, technologists, in-house counsel, and legal innovators from around the world for an afternoon of connection, conversation, and community. With limited seats and a fantastic lineup of attendees, it's the perfect opportunity to meet fellow women working at the intersection of law and tech (and their supportive allies) in an inspiring, relaxed setting before the main conference kicks off.

This year's lunch will also feature a candid panel session, where Shumin and Grace will share their personal journeys, lessons learned, and the unique challenges they've faced navigating the legal tech space. Whether you're new to the scene or a seasoned pro, come ready to mingle, be inspired, and celebrate the power of women leading the charge in legal innovation.

Special thanks to Maxwell Chambers for hosting this event at Gallery@Maxwell.

ARBITRATING ALGORITHMS IN THE AGE OF AI: EMBRACING TECHNOLOGY WHILE SAFEGUARDING JUSTICE

In today's digital landscape, the question is no longer whether to embrace technology in legal practice but how to do so responsibly and with purpose. Artificial intelligence is just one part of a larger ecosystem of emerging technologies transforming the legal sector. From smart contracts and legal analytics to virtual platforms, innovation is reshaping how legal services are delivered and how disputes are resolved.

This session takes a holistic look at how technology is changing the way lawyers work, how companies invest in legal infrastructure, and what it means for justice systems globally. We'll examine the benefits and risks of emerging tools, how legal professionals and business leaders can prepare, and what responsible innovation looks like in practice.

A&O SHEARMAN'S FUSE AND INNOVATION JOURNEY

This session will offer an inside look at A&O Shearman's distinctive approach to legal innovation, tracing how the firm continually reinvents traditional service models through disciplined experimentation, data-driven decision-making, and strategic collaboration with clients and technologists.

Join us to chart the eight-year journey of Fuse, A&O Shearman's renowned innovation space, and explore how its sandbox environment and cross-practice mentoring programs have embedded a culture of curiosity and constant iteration across the firm. Attendees will learn how Fuse projects migrate from proof-of-concept to enterprise deployment, and the measurable impact these initiatives have delivered in efficiency, risk mitigation, and new-business origination.

Discover how A&O Shearman's regional hub in Singapore acts as a catalyst for Asia-Pacific adoption by localizing global tools for diverse legal landscapes, executing on the firm's global innovation vision while responding to uniquely Asian market dynamics. Attendees will leave with a nuanced appreciation of A&O Shearman's innovation playbook and actionable strategies for nurturing a similar ethos within their own organizations.

KEYNOTE SPEECH: REIMAGINING LAW AND TECHNOLOGY

Technology is reshaping our world in fundamentally transformative ways, and at a rate that often outpaces our ability to fully anticipate and comprehend its implications. This has profound consequences for our legal system and its capacity to embrace and support technological change, while guarding against the risks that this may pose to the pursuit of justice. Striking an effective balance between these competing interests demands that we reimagine the relationship between law and technology in bold and proactive ways.

This keynote speech will endeavour to reimagine the interface between law and technology across three key dimensions. First, it will explore how the courts might harness technology's potential to drive institutional change and strengthen the administration of justice. It will then examine how legal technology may come to redefine the role of the modern legal professional and transform the delivery of legal services. Finally, it will consider the challenges that new and emerging technologies pose to the law and suggest strategies that could be employed to meet these challenges.

PANEL 1A: NAVIGATING ASIA'S ONLINE SAFETY REGULATIONS

HIBISCUS JUNIOR BALLROOM

Join us for a crucial panel discussion at the forefront of technology law in the Asia-Pacific region. This session will delve into the rapidly evolving landscape of online safety regulations, bringing together insights from key jurisdictions. Our expert panel will dissect recent legislative developments and practical experiences, including Singapore's Codes of Practices under the Broadcasting Act and Online Criminal Harms Act, alongside the anticipated "e-safety" commission and statutory torts. We will also examine developments in Vietnam, Indonesia, and Malaysia, such as the Malaysian Online Safety Bill 2024. Drawing on international experiences, the panel will analyse practices in Australia, particularly the Australian Online Safety Act, and lessons learned from the UK, including the ICO's children's code and the new Online Safety Act, as well as relevant provisions of the EU Digital Services Act. This session will provide insights into the complex web of online safety laws impacting the digital sphere across Asia.

PROGRAMME

11:00AM - 12:00PM

SESSION 1B: UNLOCKING THE POWER OF PROMPT ENGINEERING WITH GENERATIVE AI

Presented by the Singapore Academy of Law and Singapore Corporate Counsel Association

SARACA BALLROOM

Curious about how generative AI can actually work in legal practice and legal departments?

This dynamic, one-hour Prompt Engineering Foundations Workshop is designed for both junior lawyers (practice and in-house counsel) looking to sharpen their AI skills, and senior lawyers exploring the potential benefits of prompt engineering for their teams.

You will experience first-hand how better prompts lead to better AI outputs, from clearer drafting to faster analysis and fewer AI hallucinations.

By the end of this session, you will:

- Discover key principles behind high-impact prompt engineering
- Apply these principles in a guided hands-on legal scenario: participants may choose from a corporate context (ie, drafting an agreement) or litigation context (ie, drafting an affidavit)
- Receive real-time feedback on how to improve prompt design and accuracy.

This workshop is ideal for legal professionals who want to upskill in AI or explore whether prompt engineering can benefit their teams' workflows, intelligently and practically in a legal context.

Participants are encouraged to bring a laptop or tablet in order to fully benefit from this hands-on session.

PANEL 2A: AI IMPROVING ACCESS TO JUSTICE

HIBISCUS JUNIOR BALLROOM

Generative AI has been touted as the Big Disruptor for the Legal Industry. Legal Research, Contract Drafting and Management, and E-Discovery are often said to be areas that Generative AI will be able to revolutionise. But one important area has perhaps not gotten sufficient attention. How might Generative AI help improve access-to-justice? To what extent are hallucinations a problem? How might we be able to build sensible products that are relevant for the intended end-users?

PANEL 2B: LAUNCH OF SURVEY FINDINGS: LEGAL OPERATIONS – THE GAME CHANGER!

Presented by the Corporate Legal Operations Consortium (CLOC) Singapore Chapter

SARACA BALLROOM

What truly makes a corporate legal operations professional effective? While technical proficiency often dominates the conversation, a recent survey across Asia by the Corporate Legal Operations Consortium (CLOC) Singapore Chapter reveals intriguing patterns. This illuminating session uncovers the findings that might challenge conventional wisdom about the capabilities needed for successful legal operations.

Come examine the survey data together with this panel for insights and actionable outcomes that could influence how you evaluate capabilities and structure your team for success. Discover the often-overlooked elements that separate what's adequate from exceptional in in-house legal operations!

PANEL 3A: MANAGING THE MACHINE: SHAPING THE FUTURE LEGAL WORKFORCE

An INSIGHTS Panel presented by Rajah & Tann

HIBISCUS JUNIOR BALLROOM

As artificial intelligence (AI) rapidly transforms the legal sector, robust governance frameworks are essential to ensure responsible, effective, and ethical adoption. On the economic front, new pricing models and legal service delivery methodologies must be conceptualised and deployed. This panel brings together leading voices to explore the practical realities of these fundamental changes in legal practice. We will examine the build-versus-buy debate for AI products, the internal compliance challenges with rolling out AI solutions, and the complexities of handling client data, particularly when training large language models across multiple clients. The discussion will also delve into the evolving roles and responsibilities within legal teams, changes to law firm management models, and managing new job designations and career pathways such as allied legal professionals, legal engineers and legal data scientists. We will also consider the impact of these developments on the future of young lawyers. Join us for an insightful conversation as we unpack the real-world implications of rolling out AI deliberately and responsibly within legal practice.

PANEL 3B: LITIGATION, REGULATION, AND THE FUTURE OF DIGITAL ASSETS IN ASIA SARACA BALLROOM

Singapore has emerged as a key jurisdiction for crypto asset litigation in Asia, witnessing a surge in complex disputes. This panel delves into the practical challenges faced by legal practitioners in this evolving landscape, including intricate tracing of digital assets across borders, identifying obscure exchanges, and the complexities of recovering assets on decentralised platforms. Our experts will dissect the thorny jurisdictional issues arising from the cross-border nature of crypto disputes, examining the location of exchanges for enforcement purposes and the novel approaches to serving unknown parties. A crucial aspect of the discussion will be the classification of proprietary rights in crypto assets – are they choses in action, movable property, or a unique sui generis category? We will explore how leading jurisdictions like the US, UK, Hong Kong, Dubai, and Singapore have grappled with this fundamental question and the resulting implications for available legal remedies. Furthermore, we will navigate the complex regulatory environment for cross-border cryptocurrency projects, with a focus on the critical aspects of KYC and AML compliance for Decentralized Finance (DeFi) applications. Finally, our panellists will analyse the implications of the White House's stance on cryptocurrencies, as articulated in the Digital Assets Summit & Strategic Reserve and Digital Asset Stockpile initiatives and discuss their potential impact on the Asian crypto market. This panel will provide invaluable insights into the current legal challenges and future directions of crypto law.

9:45AM - 10:30AM

KEYNOTE SPEECH: TRUST AS INFRASTRUCTURE: CAN REGULATION BE THE FOUNDATION FOR RESPONSIBLE INNOVATION?

Commissioner Edwards will share his observations and practical insights from regulating data protection and privacy authorities in Europe and the Asia Pacific with public trust and people at the heart. The UK ICO has a "whole economy" remit, with increasing expectations from organisations, civil society, and lawmakers to reduce burdens on business, support economic growth and protect individuals' data rights. Commissioner Edwards will outline how the ICO is working creatively, and in partnership with others, to achieve this through prioritising key causes; children's privacy, AI and biometrics and online tracking, while implementing new data legislation and ensuring organisations take cyber security seriously.

MR JOHN EDWARDS
UK Information Commissioner

11:00AM - 12:00PM

PANEL 6A: DECODING DIGITAL INFRASTRUCTURE REGULATIONS IN ASIA HIBISCUS JUNIOR BALLROOM

As the digital landscape in Asia continues its rapid expansion, the backbone supporting this growth – data centres – faces a complex web of evolving regulations and sustainability demands. This panel delves into the critical aspects of establishing and operating data centres across the region. We will explore the diverse types of data centre infrastructure, the nuances of cross-border data transfer regulations and their strategic implications for data centre location and capacity planning. Gain crucial insights into the existing regulatory frameworks governing data protection and cybersecurity (including the implications of CII and foundational digital infrastructure designations). Stay ahead of the curve with discussions on regulatory developments such as the EU NIS2 directive and Singapore's new digital infrastructure bill. Finally, we will address the growing importance of sustainability, examining green data centre standards and best practices.

TIME

PROGRAMME

11:00AM - 12:00PM

SESSION 6B: UNLOCKING THE POWER OF PROMPT ENGINEERING WITH GENERATIVE AI

Presented by the Singapore Academy of Law and Singapore Corporate Counsel Association

SARACA BALLROOM

Curious about how generative AI can actually work in legal practice and legal departments?

This dynamic, one-hour Prompt Engineering Foundations Workshop is designed for both junior lawyers (practice and in-house counsel) looking to sharpen their AI skills, and senior lawyers exploring the potential benefits of prompt engineering for their teams.

You will experience first-hand how better prompts lead to better AI outputs, from clearer drafting to faster analysis and fewer AI hallucinations.

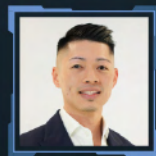

By the end of this session, you will:

- Discover key principles behind high-impact prompt engineering
- Apply these principles in a guided hands-on legal scenario: participants may choose from a corporate context (ie, drafting an agreement) or litigation context (ie, drafting an affidavit)
- Receive real-time feedback on how to improve prompt design and accuracy.

This workshop is ideal for legal professionals who want to upskill in AI or explore whether prompt engineering can benefit their teams' workflows, intelligently and practically in a legal context.

Participants are encouraged to bring a laptop or tablet in order to fully benefit from this hands-on session.

1:00PM - 2:00PM

PANEL 7A: CROSS WINDS IN GLOBAL TECH TRADE

HIBISCUS JUNIOR BALLROOM

Join us for a crucial panel discussion at the forefront of technology law in Asia. Experts will delve into the complex and evolving landscape of US trade policies and their profound impact on the region's technology sector. We will unpack the implications of recent US export restrictions on advanced technologies like GPUs, examining the nuances of frameworks such as the US Framework for AI Diffusion and the CHIPS Act. Our panellists will also analyse the sweeping effects of US universal tariffs on the tech industry, particularly their repercussions for Asian economies. Furthermore, we will explore the vital role of Digital Economy Agreements in this environment and how US tariff policies intersect with and potentially reshape the future of digital trade across Asia. This is a must-attend session for legal professionals, policymakers, business leaders, and anyone keen to understand the forces shaping the future of technology and trade in Asia.

PANEL 7B: AI IN LEGAL PRACTICE: EXPECTATION VS REALITY

An INSIGHTS session presented by vLex.

SARACA BALLROOM

There's a gap between what's possible with AI in legal practice and what lawyers are actually doing. Join Daniel Hobson, Head of APAC at vLex, as he shares insights from overseeing AI adoption across 80+ law firms, 150 barristers, and 25 in-house teams throughout APAC covering common use cases, concerns, and the reality check needed. You'll also hear from Julian Cohen of Resolution Chambers, a top-ranked disputes and arbitration lawyer in Hong Kong (Legal 500, Who's Who Legal) and early AI adopter, plus guidance on AI reliability boundaries. This session provides a real-world perspective to help you assess where you stand and how to move forward strategically.

TIME

PROGRAMME

2:00PM - 3:00PM

PANEL 8A: COPYRIGHT IN A GENERATIVE AGE

HIBISCUS JUNIOR BALLROOM

This dynamic panel discussion will delve into critical updates shaping the future of intellectual property in the digital age. We will explore the US Copyright Office's evolving stance on AI-generated works, examining the nuances from commissioned pieces to "selection and arrangement." Gain insights into the latest developments surrounding text and data mining exceptions, crucial for computational data analysis. Our experts will also dissect recent fair use litigation in the US, including the significant Thomson Reuters v Ross Intelligence case. Finally, we will provide essential updates on key intellectual property case law emerging from China, such as the Li v Liu and Ultraman cases, offering a comparative perspective for the Asian legal landscape. This session will provide a roadmap for navigating the complex intersection of law and technology in Asia and beyond.

PANEL 8B: LEGALTECH GOWHERE X TECHLAW.FEST [OPEN SESSION]

Presented by Ministry of Law, Legal Technology Transformation Office and Singapore Academy of Law
SARACA BALLROOM

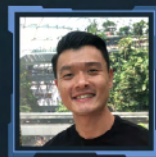

Looking for a post-lunch pick-me-up? Join us for a fast-paced, interactive session that blends networking, friendly battle, and a sneak peek into Singapore's legaltech ecosystem.

Kick off with speed networking, where you will meet fellow legaltech enthusiasts and make meaningful connection in minutes. Next, get ready for the "Legaltech battle" segment where speakers engage in a light-hearted showdown of ideas, innovation and wit. Expect sharp insights, unexpected twists, and plenty of laughs.

Stay till the end for a sneak peek into Legaltech GoWhere – the Singapore Ministry of Law's latest initiative to coalesce mindshare and heartshare for legaltech. Discover what's coming next, how to stay connected, and how to be part of the movement.

Whether you're a legal innovator, tech enthusiast, or just curious, this session promises fun, fresh perspectives, and front-row seats to Singapore's legaltech movement.

TIME

PROGRAMME

3:30PM - 4:30PM

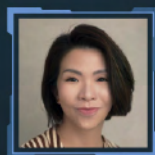

PANEL 9A: THE END OF THE HOUR? SMARTER BILLING STRATEGIES FOR THE MODERN LAW FIRM

HIBISCUS JUNIOR BALLROOM

The traditional billable hour model is under pressure. As artificial intelligence and automation mature within the legal sector, they're not just changing how legal work is done; they're redefining how it's valued and priced. Clients also are increasingly demanding transparency, value, and predictability, forcing law firms to rethink how legal work is priced, measured, and delivered.

Can AI be used to model risks, forecast fees, and justify estimates? Are there tech solutions that can boost efficiency by streamlining workflows and minimise non-billable activities? Join us for a panel discussion that will seek to unpack evolving billing strategies and examine how technology, automation, and new metrics can support new commercial models without compromising legal excellence.

PROGRAMME

3:30PM - 4:30PM

PANEL 9B: GENERATIVE AI AND THE LEGAL PROFESSION: TOWARDS ETHICAL AND EFFECTIVE ADOPTION

Presented by the Law Society of Singapore

SARACA BALLROOM

Generative AI has the potential to reshape the practice of law. Studies indicate that its adoption can save lawyers as much as four hours per week. Time saved can be redeployed to higher-value billable work or towards improving lawyers' overall well-being.

However, these gains will only be realised if AI tools are implemented ethically and effectively. Recognising this, the Singapore Judiciary has issued a Registrar's Circular setting out expectations on the ethical use of Gen AI in court submissions. Looking ahead, the country's Ministry of Law has released - for consultation - a draft guide that will extend these considerations to the broader legal sector.

This panel, comprising members of the Law Society's Generative AI, IT, and Cybersecurity & Data Protection Committees and the Ministry of Law, will examine how such policy instruments can guide Singapore's lawyers in navigating the opportunities and risks of Gen AI. Beyond compliance, the discussion will consider how responsible adoption can strengthen professional standards, safeguard the administration of justice, and position Singapore's legal sector at the forefront of innovation.

PANEL 10B: TLF X YOUTH - SHAPING TECH FOR YOUTH! [OPEN SESSION]

SARACA BALLROOM

TLF x Youth offers young voices the chance to be heard in the shaping of technology policy.

In an age where digital platforms shape social norms and where online safety is becoming a huge topic of focus among governments and individuals, it is critical that youth are not just passive users of technology, but active participants in designing the rules that govern it. This session spotlights the role of young people in advancing responsible innovation, building safer online communities, and contributing to meaningful policy conversations in Singapore and beyond.

Whether you're a student, a young professional, or simply curious about how law, policy, and technology intersect, join us for an energising discussion led by youth voices and supported by industry leaders and policymakers — let's explore how young people can help co-create a digital future that is safer, fairer, and more inclusive!
